## Frequently Asked Questions

1

Why does system indicate that my Two-Factor Authentication with Software Token service is not activated upon registration?

Please contact us to activate the PCSEC Security Token's service.

2

Can I register PCSEC Security Token on more than one device?

For security reasons, your PCSEC Security Token can only be registered to one device at a time.

3

Can I use PCSEC Security Token App with my tablet?

PCSEC Security Token App is supported on iOS and Android devices, including tablets.

4

Why does system always indicate that my entered One-Time Password is invalid upon login?

Since PCSEC Security Token service is time-sensitive, please check and rectify the time setting of your mobile ("Set Automatically" should be turned ON), and restart PCSEC Security Token App after the time adjustment.

5

What should I do when I want to change my mobile device?

You are recommended to uninstall the PCSEC Security Token App at your old mobile phone. Then please re-install the PCSEC Security Token App and re-register your token at your new mobile phone.

6

What should I do when PCSEC Security Token registered device is lost or stolen?

Please contact us to disable the current PCSEC Security Token service.

7

Why do I have to set up PCSEC Security Token App password?

To help prevent anyone else using your mobile device to perform login, you will be asked to setup a password for your PCSEC Security Token App. Please be noticed that you need to input password when PCSEC Security Token is locked. The Auto lock time can be adjusted at the setting page of PCSEC Security Token App.

8

What should I do if I forget the password of PCSEC Security Token App?

Please uninstall PCSEC Security Token App and re-install it again. Please be noticed that for security reason, all the stored token(s) will be deleted. Please re-register again after new installation.

9

Why PCSEC Security Token App cannot be installed on a jailbroken/rooted device?

Since your device is jailbroken/rooted, your device will be less secure and may lead to fraudulent transactions. Please use another non-jailbroken/rooted device to register PCSEC Security Token service again.

10

Can I restore the registered Token(s) from the backup of the phone?

Please be noticed that for security reason, all the stored token(s) will not be restored. Please setup the password and re-register again after the phone restoration.
