# 1. Singapore tropical climate

Post Date : 2018-9-6

Singapore is tropical climate with a year-round summer.

When it rains, not only washes away the summer, but also brings the coolness that give Singapore another appearance.

From November to March, it is the rainy season in Singapore. With the influence of northeast humid monsoon, the rainfall is abundant and also brings enough water for those green plates.

Singapore is a warm, rainy, and a garden city that can be visited in all seasons.

## 2. Singapore's multicultural

Post Date : 2018-9-6

Although Singapore is small, it has a multi-ethnic integration and historical changes, combine the modern and traditional, and became a multi-national culture. There are more than 70% Chinese, and still many are from India and Malaysia. Because of the unique architecture left by British colonial period, it brings travellers a better understanding on cultural characteristics of Singapore.

## 3. Economic miracle in Singapore

Post Date : 2018-9-6

Singapore was colonised by British for a long period. At that time, Singapore was not only a military base in Southeast Asia, but also a entrepôt centre for European trading.

In 1959, Singapore was separated from British colonial rule. Singapore has overcome difficulties and obstacles, the political situation has not only stabilised, but the economy has grown.

It has created the miracle in the economy and has enabled people to achieve improvements in their lives.

## 4. Singapore green policy

Post Date : 2018-9-6

The land area of Singapore is 719 sq km, which is smaller than other countries.

Although Singapore is not large, it is a good security, and green city.

With land limitation and high population density, Singapore still has Bukit Time Nature Reserve and Sungei Buloh Wetland Reserve. In addition to being an ecological reserve, it also protects important water resources for Singapore.

In terms of urban space, as Singapore emphasises on greening and sustainable development, it retains a considerable degree of biodiversity.
